

Introducing real time, multi-delivery, multi-alarm notification with our new M 4000 Enterprise Management Server

M 4000

Our M 4000 Real Time Enterprise Management Server is specifically designed to connect to, and deliver critical alerts to the remote handheld device of your choosing from all monitored infrastructure components in your building, including:

- **Nurse Call**
- **Phone System**
- **Fire Annunciator Panel**
- **HVAC System**
- **Geo-Thermal Heating**
- **CCTV Systems**
- **Staff Emergency Pagers**
- **Burglar Alarm Systems**
- **Freezers and Coolers**
- **Access Control**
- **Resident Phone System**
- **Lighting Control**

The M 4000 is a failsafe, remotely programmable notification device that allows infinite granularity when deciding what devices in your facility you wish to monitor, who in your organization receives notifications, and when. Real time logs also allow detailed analysis on problem residents and staff efficiency in response to emergency calls.

Get

COMPLETE CONTROL

M 4000

The TotalConnect M 4000 is the payload delivery module for an ever increasing line of software products designed specifically for Life Safety and Facilities Management applications. Each of these products solves a specific communication need within your building or facility. Our system acts as a customizable translation server that is very talented. We speak many languages and provide translations services for all of the supported devices in your facility.

GREEN

As the issue of global warming grows, each resident of our global village has the responsibility to use eco-friendly products. In order for us to support this new Green Movement, TotalConnect has launched the new M 4000. This new product has an extremely efficient power saving function. For example, the power consumption of a typical PC would usually take over 300W. To reduce environmental waste, the M 4000 consumes only 30W of power when idle. Even when the M 4000 is in full use, power consumption is only less than 55W.

EASE OF INSTALLATION

Our serial extender devices can be purchased to allow you to bring the serial interface from any unit in your building over 4,000 ft to the main installation location of the M 4000.

- **TCE 4000 SERIAL EXTENDER**
